One observed PR3 sky — split-direction sensitivity
Original pseudoalm
Secondary |b|>20°, L128
Secondary |b|>30°, L128
Signed J234
Alignment23 squared
Removed fraction α of fitted split-direction component
Removed fraction α of fitted split-direction component
DIAGNOSTIC: data-derived HM/OE projection in processed E ℓ2–4; Euclidean harmonic-power metric.
No physical cleaning or null probability. Windows repeat operators on one sky. α scales amplitude, not power.
