Fixed-source C0 Gaussian quotient certificate candidate
T_full (q=13)
≈[75.078622161, 75.078623734]
T_E1 (q=3)
≈[87.002602217, 87.002602359]
Delta = T_E1 - T_full
≈[11.923978484, 11.923980198]
Stored conditional E1 Delta p upper ≤ 0.29017657168415; scoped Gaussian/C0 conditional review PASS.
Each row has its own zoomed scale. Rounded display only; exact certified interval endpoints are in RESULT.json.
Fixed source and working covariance only; physical coverage NOT ESTABLISHED; no detection claim.
