Fixed L02 family on eight source-matched FFP10 T/E/B rows
Same-row component/amplitude diagnostics; no null significance or coverage
T joint quadrupole/octupole axes
E joint quadrupole/octupole axes
B joint quadrupole/octupole axes
Squared headless-axis overlap
Matched simulation ID
CMB
Noise + systematics
Sum
T descriptor sensitivity: noise ×1.05
E descriptor sensitivity: noise ×1.05
B descriptor sensitivity: noise ×1.05
Signed shift from same-row baseline
