Gaia-INFO-01 — saved Gaussian-law validation, not a physical Gaia detection
The question determines useful information
Signed, specified direction
Energy / joint GLS omnibus
Power, level 0.05
Signal Mahalanobis amplitude
Correct scalar law; sign is still lost
Radial energy compression
Efficient score / tensor coordinates
Retained Fisher fraction
Signed-amplitude magnitude
Cross-bin mean-family experiment
Coverage of nominal 95% region
Joint GLS
= tensorized
Independent
bins
Independent +
joint sandwich
