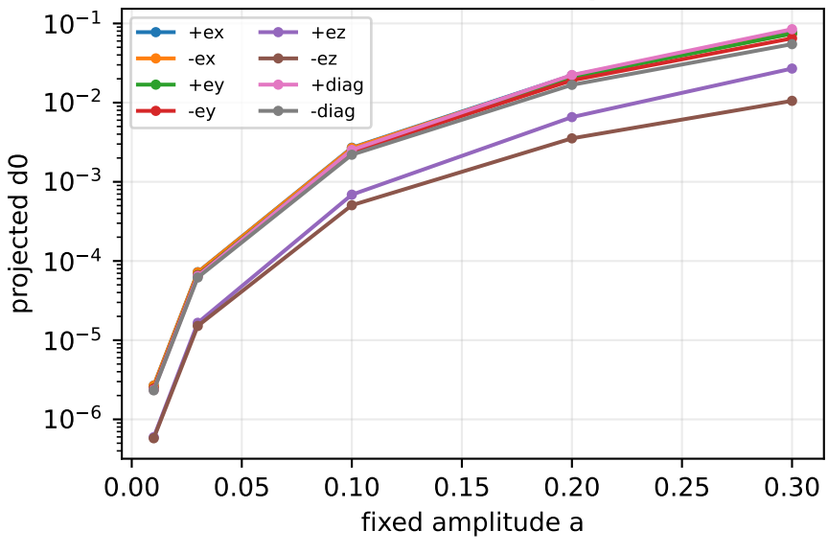
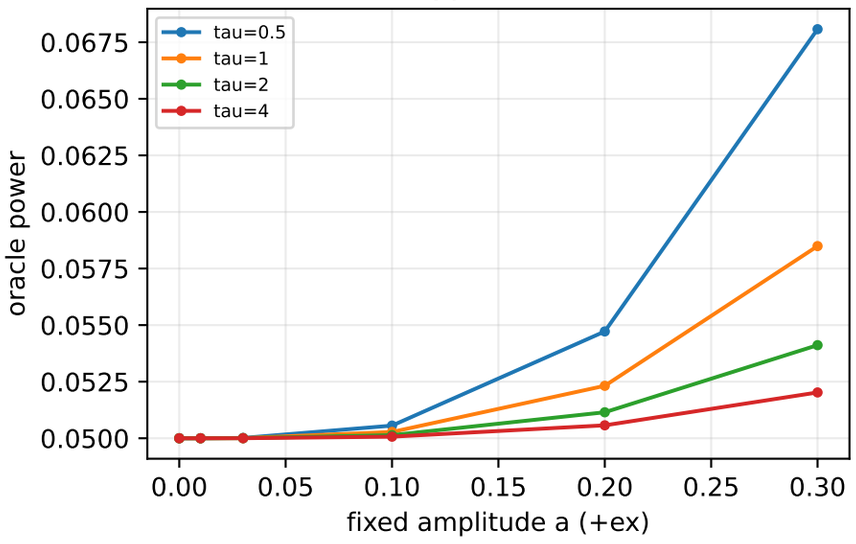
Conditional leading-low-z nonlinear optical quotient; descriptive fixed scenarios

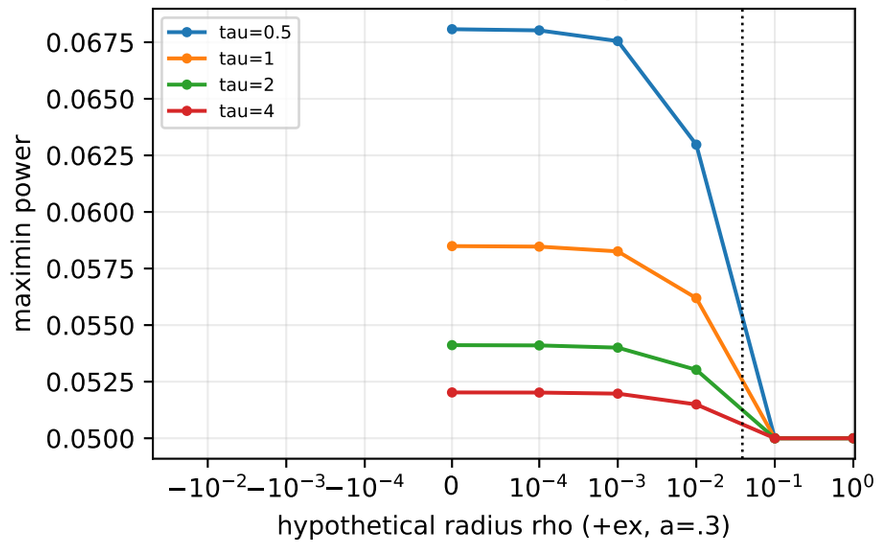
ac=0, bc=0 mag



known hypothetical noise



same ball under both hypotheses

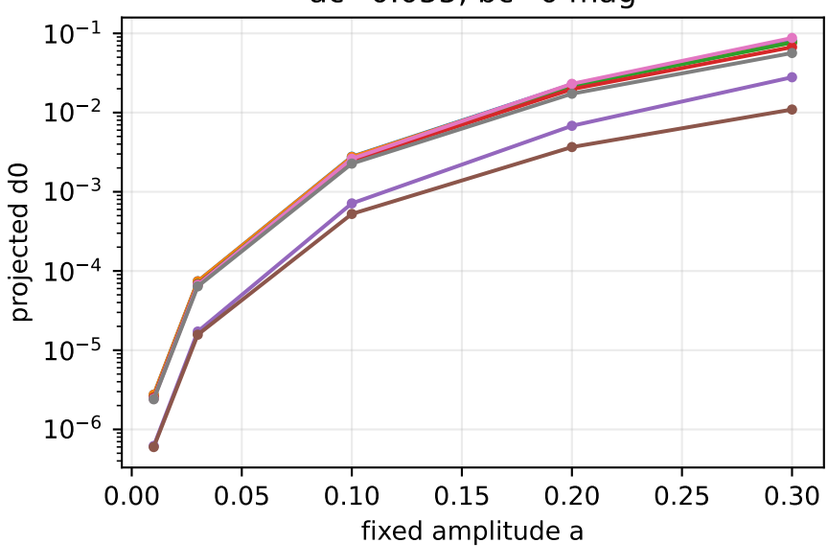


ac=0, bc=0.29 mag

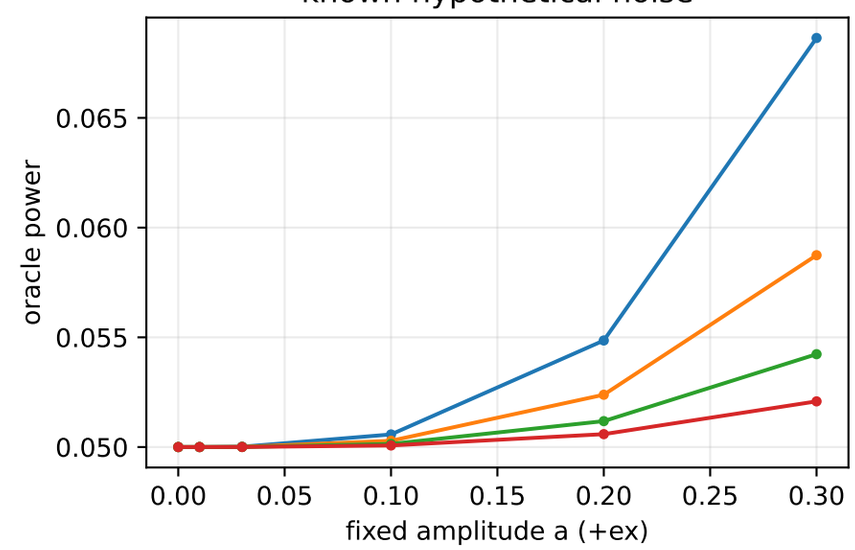
known hypothetical noise

same ball under both hypotheses

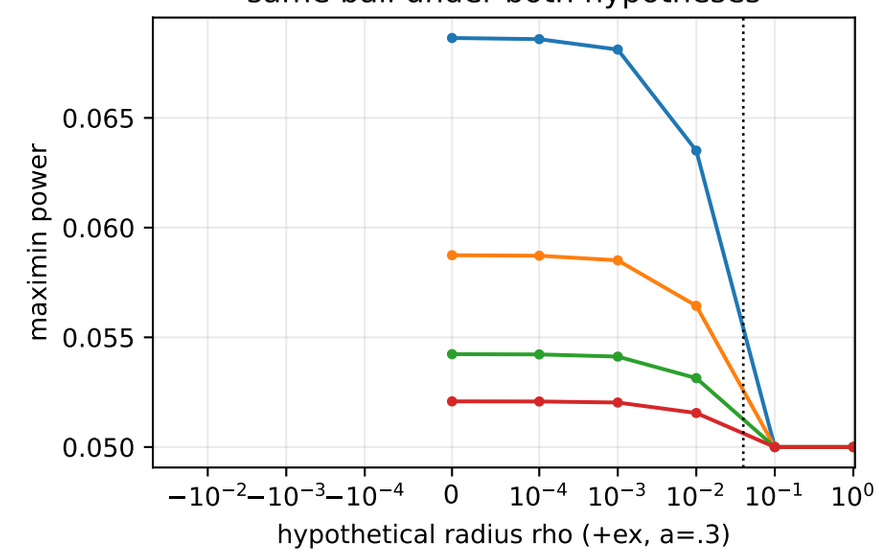
ac=0.055, bc=0 mag



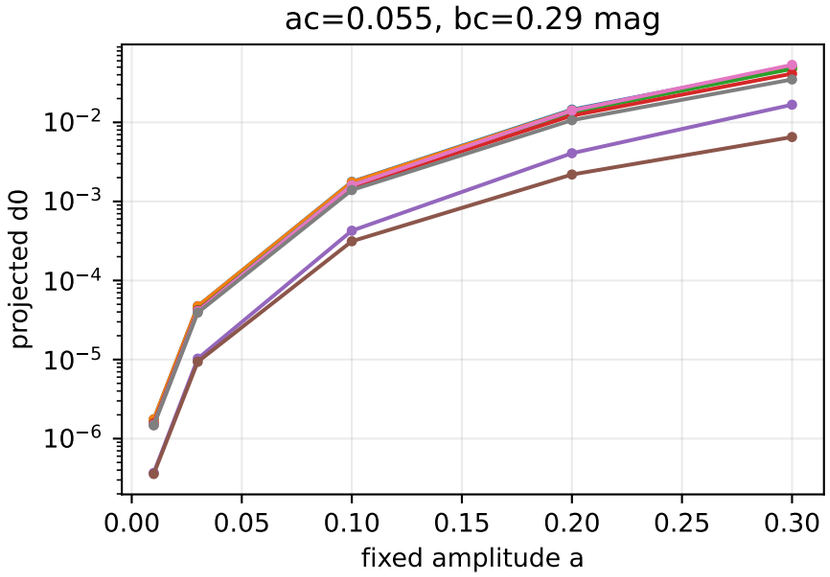
known hypothetical noise



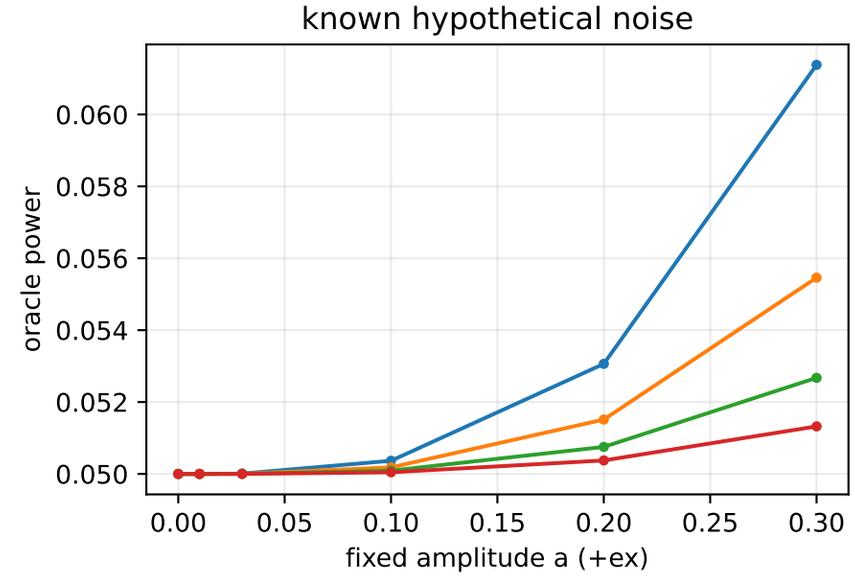
same ball under both hypotheses

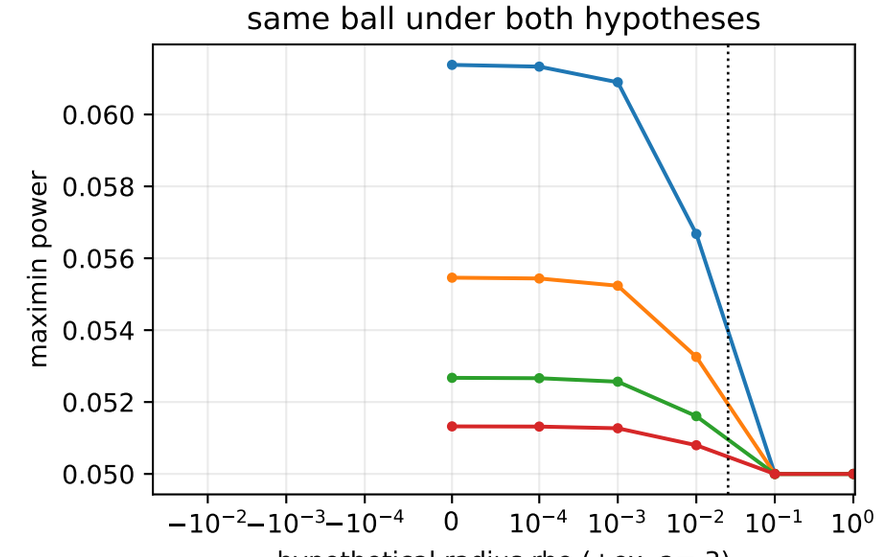


ac=0.055, bc=0.29 mag



known hypothetical noise





same ball under both hypotheses
