Brightness quadrupole amplitude a
$|m| = 2$: $(56 - 10a)/105$ (multiplicity 2)
$|m| = 1$: $(56 + 5a)/105$ (multiplicity 2)
$m = 0$: $(56 + 10a)/105$ (multiplicity 1)
Certified lower bound $\lambda_{\min}(M_2)/\rho$
