Static entropy projection: analytical radiation example, no measured CMB
Angular reconstruction
Target brightness
Entropy fit L=2
Entropy fit L=4
Brightness I/I_0
Propagation cosine μ
Positive unresolved entropy
1e−4
Entropy defect $\Delta S/S_{iso}$
Retained angular cutoff L
L=4 preserves the response
Operator error / ρ_0
Exact L=4 structural error: 0
Computed: roundoff
Curvature estimate
Computed operator error
Retained angular cutoff L
